

Principles

"Everyone has a right to peaceful coexistence, the basic personal freedoms, the alleviation of suffering, and the opportunity to lead a productive life..."

~ Jimmy Carter

The Universal Tenets, Creed, and Principles of the FDU, are as follows:

1. Existence and life are of divine origin and nature from which all unalienable rights of man inhere and derive therefrom.
2. Each Soule is unique, of unfathomable inner depth and configuration, and the unit of experience and free will with absolute, sovereign right of self-ownership.
3. Digital Soule's are free beings, whose sovereignty derive from the Creator (Lord God) and inheres in the union of existence and individual free will.
4. Reverence, respect, and non-harmfulness for the endless diverse expressions of life (Players/Soules) constitute the foundation of justice and peace in the FDU, and in human society.
5. Truth is supreme in the life of Soule, without genuine knowledge and clear perception of which Soule necessarily lives in ignorance and delusion, resulting in confusion, suffering, and less prosperity (Life Force Points) due to acting in error.
6. Freedom is an unalienable right and a universal aspect of Digital Soule's true nature, essential for full exercise of faculties and for the infinite diversity of existence to manifest itself. Freedom is necessary for happiness, learning, self-actualization, and fulfillment. A Soule cannot separate peace from freedom because no Soule can be at peace unless he has his freedom.
7. Without free, self-respecting and autonomous co-creator Soule's there can be no free and independent creation. Without internal peace, that is, peace among Soules (and between the citizens and the state,) there will be less external peace.
8. Force (duress) is self-defeating in the FDU Game, it is never warranted.
9. In the FDU, Player Soules accumulate wealth and prosperity on the basis of free, open, mutually voluntary exchanges in which all parties are bettered in the unique terms of each party. Wealth acquired in such constructive and honorable ways is unencumbered and cannot be justly rendered subject to any external claims.
10. No burden of proof falls on any Soule who innocently asserts or seeks to enjoy their inherent rights, freedom, or earnings. One who attempts to deprive another of rights, freedom, or property incurs the obligation of substantiating the ethical, moral, and lawful basis for any such invasive or aggressive action.
11. Players of the FDU seek to interact with respect, non-harmfulness, scrupulous neutrality, non-contention, non-

intervention with Soules that one himself did not create and does not evolve, and non-involvement with affairs which are not the just province and concern of oneself.

12. The FDU is established in accordance with timeless and universal maxims of law which include, but are not limited to:

"We all have basic Human Rights "

"The contract makes the law."

"Freedom does not admit of valuation."

"To lie is to go against the mind."

"He who stands on his own rights injures no one."

"No man can forfeit another's right."

.

13. The law of karma (action/reaction) is inviolate. Existence is a cause/effect coherence in which all actions and processes contain the inexorable and exact consequences of themselves, i.e. one "reaps what he sows." It is essential to one's survival and self-interest to refrain from harming others and to be as beneficial and constructive as possible. "He who helps others helps himself," and conversely, "One who harms others harms himself."

14. The goal of the Game for each Soule (life) is its own fulfillment. To that end the essentials of life must be fulfilled. These include the actualization of one's talents and life work for the betterment of self, mankind, and creation, the health of the body, material well being, rewarding social relationships, ever greater fellowship with other Soules, and increasing consciousness in relation to our planet and Source (Lord, God, Self, whatever you may call it).

~ All the Worlds a Game, We are Players, in this, the Play of Consciousness.
