

Charitable Support

The FDU includes a Game designed as a charity fund raiser for supporting multiple charitable organizations associated with the enterprise GATE platform made up of FDU partners. Funding recipients are qualified on our platform at www.PeacePortal.mobi

Small and new charities, faith-based associations, and other non-profits may qualify for funding via the FDU Game as a Soule Family, larger organizations involved in global projects

are supported by the Peace Portal Mutual Benefit Association, and corporate Vendors such as GetZooks.biz who support the FDU platform.

To ensure the charitable fund-raising activities and individual wealth developing purposes of the FDU are supported and achieved, all involved partners from corporate to charitable are assembled collectively in the FDUMA (Free Digital Universe Management Association) from which they can coordinate the charitable enterprise platform. Charitable projects are integrated by partners participating in the Peace Portal portion of the FDU.

Peace Portal is currently planning two large scale humanitarian efforts that are at the core of a sustainable and holistic economic system; these efforts are Prosperity Program, and Access Point Project .

Access Point connects partners on the ground (such as One Laptop per Child, Inveneo or Room to Read) with the FDU Games private global commerce platform for empowering the poor to improve their lives by accessing opportunities over the Internet, including equal compensation for their labor using an unencumbered virtual currency of Life Force Points.

We utilize the increasing availability of Information Age technologies with Internet based market opportunities designed specifically to meet the needs of people who are economically dis-enfranchised and whom are regularly excluded from mainstream consideration.
