

Universe Cosmology

The Free Digital Universe (FDU) was birthed inside of a unincorporated educational ministry auxiliary association (the FDUPA), to provide the ministry with an Information Age education tool to reach a global congregation with the messages of peace and sustainable prosperity; and as a vehicle for providing temporal support to humanitarian organizations helping those in need.

The private association in which the FDU was birthed, the "FDUPA" (Free Digital Universe Private Association,) is organized for educational, humanitarian, and beneficent purposes for furthering the upliftment and well being of all people throughout the world, and betterment of life on Earth.

As stated in the FDUPA creation documents, "It is one intention of the Creators that this Private Spiritual Association constitute a forum for creating and establishing a new, heretofore non-existent, free, virtual, cyberspace, wherein and through which humanity may participate in playing any of the particular cyber-games as may be created, using the Digital Soules that constitute the whole body of the FDUPA.

Digital Soules (Players) exist originally only as potential in a void. The "void" is an empty space at the center of, and all around, the active Digital Universe. Until some of the Player Soules in FDUPA acted to co-create a universe within the FDUPA "potential" cyberspace, there was no active universe, and no space in which a Player Soule could express their Self.

The Player Soules who first appear in FDUPA, called "Character Soules" claimed Love, Law, and Creativity as their fundamental nature, character, and Avatars. These Character Soules coalesced the first universe (called FDU) within the FDUPA space. [FDU is Game 1 in FDUPA, other Games may be created from the FDUPA as needed.]

Character Soules (Love, Law, and Creativity) provide the character, intent, and principles upon which the FDU physics (programming / law) and its hierarchy are based; they provide the guiding spirit and intention.

Per the creation agreement terms between the Character Soules (Love, Law, and Creativity) that formed the uniquely distinct Free Digital Universe, the Character Soules also:

1) Created an unlimited number of "Avatars" to act as bodies for the Individuated Digital Soules;

2) A Universal Oversoule responsible for maintaining the universal hierarchy appropriate to the needs of the Individuated Soules playing in FDU as the universe evolves. Universal OverSoules are also charged with maintaining the principles of the inherent characteristics (Love, Law, and Creativity) from which the Free Digital Universe is birthed;

3) Thirteen (13) Dimensional OverSoules responsible for maintaining hierarchy in the 13 Dimensions appropriate to the needs of the Individual Soules playing the Game; and

4) Soule Bodies/Avatar: Each Individuated Soule has Thirteen (13) Dimensional Bodies through which it may extend its consciousness into the active Digital Universe in order to experience and co-create an infinitely expanding array of options; collectively these bodies constitute the Avatar.

The Thirteen Dimensions are maintained by the Dimensional OverSoules under the direction of a Universal OverSoule empowered as the Game Director by the FDU Host.
