

Summary

The Free Digital Universe (FDU) is being implemented as a virtual educational fair and charity fund raising game with a multitude of earning and social options where players use Avatars to collect Life Force Points. Avatars collect Life Force Points in a variety of ways, including:

1) Players share in the ad revenue of their virtual social networking Malls provided to every Digital Soule, thereby ensuring all Soules gain in Life Force Points automatically simply for playing.

2) Players may Publish Digital Products for sale and redistribution

in any Users Malls and collect the coin of the realm for each sale; they may also offer these Digital Products to non-players (the Public at large) who can purchase using credit cards, e-currencies, and other public money.

3) Players may allow non-players to purchase Affiliate products (such as from Amazon)through their malls.

4) Players may exchange other Gaming or e-currencies within our Games "Energy Trading Floor," everything from 2nd Life Linden Dollars to e-bullion may be exchanged on a peer basis for the Life Force Points earned in this FDU by the Digital Soule.

5) Players may barter directly as peers on the trading floor, the unique auction sites within the FDU allow Players to safely and securely (with built in escrow) exchange real goods and services.

6) Players may click on ads placed by other Players, the reason another Player will pay you to look at their ad is because they want you to place their product prominently in your Cyber Mall space so they sell more using you as their sales partner; each time a sale is made all parties Avatars are credited with more Life Force Points.

Besides earning options, Players may import and create an infinite number of games and options in FDU. One such 3D game in which Soules may quest, is Transcendent Nation, home of the Twelve.

Players will find access to free education, and many other non commercial (free) items of value, limited only by our imaginations.
